EDUCATION

University of Edinburgh

BSc (Hons) Computer Science and Mathematics

Edinburgh, UK

Sept. 2026 – Present

The High School of Glasgow

4 Advanced Highers at A1; 5 Highers at A1; 1 A Level at A*

Glasgow, UK

Completed 2026

- Robin Easton Quaich for Outstanding Academic Achievement (2026); highest mark in year for AH Mechanics, Physics, Maths and Computing.

EXPERIENCE

Founder & Leader, Computing Club

The High School of Glasgow

Glasgow, UK

- Founded and ran the school computing club, improving students' Python coding skills and problem solving abilities, as shown by an increase in their score on the UK Bebras Coding Challenge.

Technical Support Volunteer

RCS Haven

Glasgow, UK

- Managed website and email infrastructure using WordPress and Cloudflare; supported event organisation and explained concepts to learners as teaching support staff.

Team President

UK Space Design Competition

- Led a team tackling engineering design problems under tight deadlines, allocating work and balancing design constraints, risks and practical trade-offs.

PROJECTS

Panenka — Multiplayer Football & Multi-Agent RL

In progress

- Co-developing a browser-based football game in TypeScript and SvelteKit, with a Python/JAX environment for training multiple reinforcement learning agents using PPO.
- Implemented WebSocket server functionality, room creation and joining, and basic online play with server-managed game state and state updates to connected players.
- Added client-side predictive rendering with server reconciliation and interpolation, improving game playability up to 1000ms ping.

Stock Market Simulator | Python, SQLite, Alpaca API

- Built an object-oriented trading simulator with buy/sell orders, portfolio valuation and latest trade prices from the Alpaca market-data API.
- Persisted holdings and transaction history in SQLite; implemented balance and share-quantity checks, stock lookup and sortable portfolio and transaction views.

Full-Stack Web Application | React, Node.js, Express, MongoDB

- Developed a web application with user accounts, authenticated API requests and a token-based purchase system; integrated Stripe payments and webhooks.
- Configured local hosting, Nginx reverse proxying and Cloudflare; used Docker to isolate processes.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML/CSS, C

Frameworks: React, Node.js, Express, SvelteKit

Databases & APIs: SQLite, MongoDB, REST APIs, WebSockets, Stripe, Alpaca, Django

Developer Tools: Git, GitHub, Docker, Nginx, Cloudflare, WordPress
